Building Sustainable Confidence Over Decades

**CLIMATE
LEADERS
2022**

**CLIMATE
LEADERS
2021**

De La Rue; Top quartile of European climate leaders (2021 & 2022)

Financial Times and Statista

Lower Energy Consumption

2.5 million KWh per annum reduction in Malta site through multiple initiatives, including 'cool roofs'

Production efficiencies

Improved SAFEGUARD® with 2.3% less waste

Water reduction

Water use down 16% in last four years

Thermal regeneration

Auto-thermal processing for security feature manufacture since 2001

Recycling

SAFEGUARD® is 100% recyclable, polymer recycling facilities are widely available and 100% of De La Rue's production and UK polymer waste is recycled

Renewable energy

100% renewable electricity for all UK sites

Lower Impact Products

SAFEGUARD® lasts significantly longer in circulation than non-polymer substrates

Measuring Energy

Achieved FY22 target of 7.5% reduction of energy per tn of good output

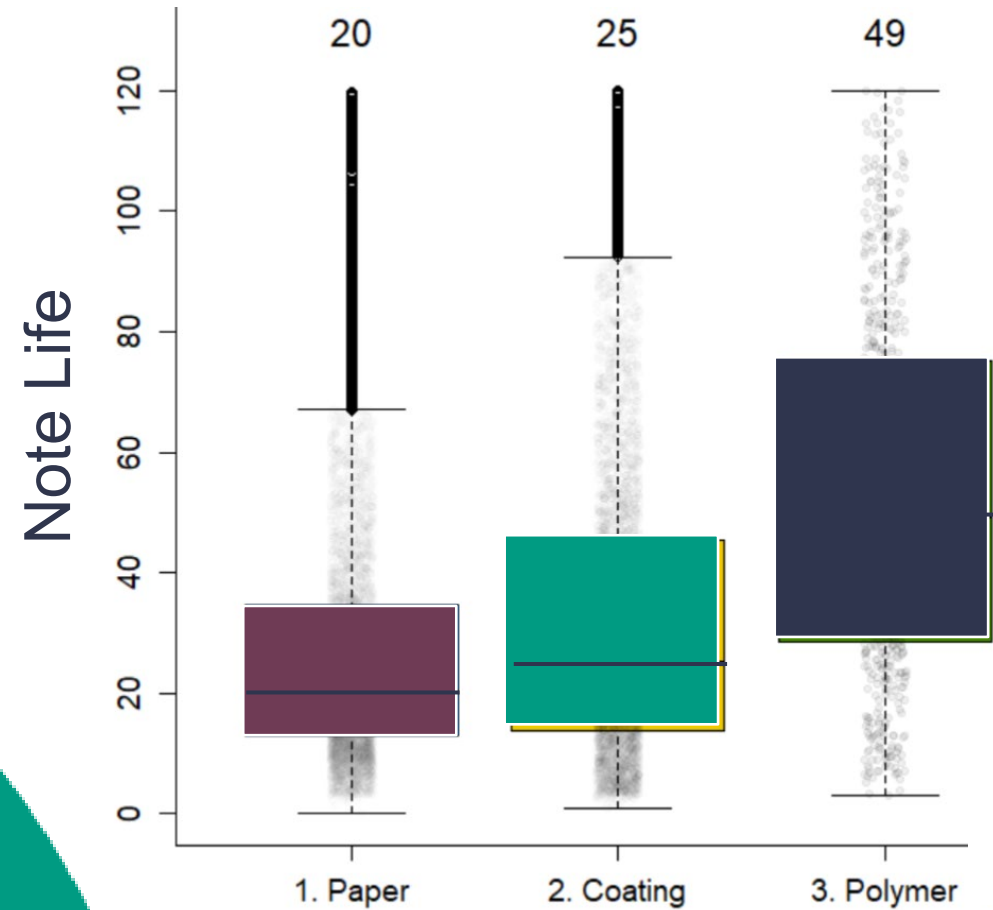

Our Commitment

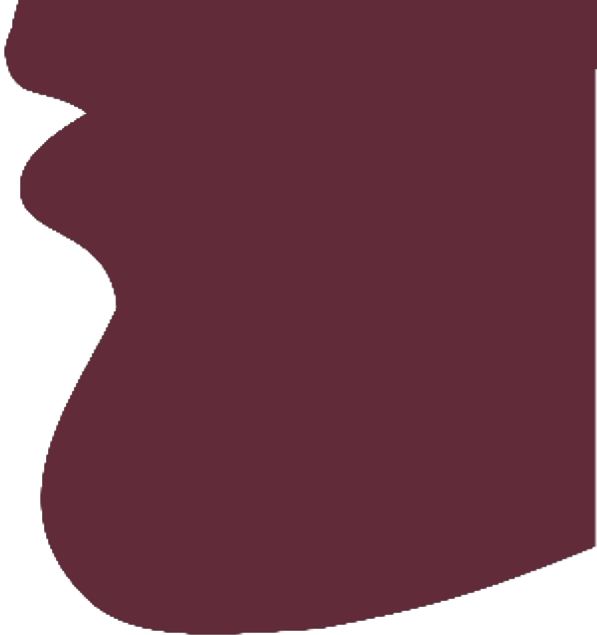

- Carbon neutral in our operations by 2030
- Scope 1, 2 and 3 emissions reduced 46.2% by 2030
- Net Zero by 2050
